> **i** **Note:** To order CSAN® Pronto® Auto-Check Strips, please contact CSAN® Order Desk at 1-866-669-2313.

1 INTENDED USE

The **CSAN® Pronto® Auto-Check Strip** is a reusable strip that includes white blood cell (WBC) and neutrophil graphic depictions in the appropriate aspect ratio and size. It includes three levels of WBC and neutrophil percentages (NEUT%) for different concentration counts. The CSAN® Pronto® Auto-Check Strip is intended to verify the suitability of the CSAN® Pronto® and is to be used with the CSAN® Pronto® system only.

| Level	Expected WBC Range (K/µL)	Expected Neutrophil % Range
Low	2.1–3.9	30–50%
Medium	7.0–10.1	50–70%
High	20.2–24.4	70–90%

2 ACCESS THE CSAN PATIENT CARE PORTAL®

- Go to **www.csan.ca** to access the login page for the CSAN Patient Care Portal®
- Enter your username and password and click "Login"
- To obtain a username and password, contact CSAN® at 1-800-267-2726

3 RUNNING A CSAN® PRONTO® AUTO-CHECK STRIP TEST

A. Click on the CSAN® Pronto® logo on the home page

B. Click on "Quality Control Test"

C. Select "Auto-Check Test Strip"

D. Select the device and click "Next"

E. Enter the CSAN® Pronto® Auto-Check Strip lot # and click "Next"

F G H

F Make sure the magnetic strip of the CSAN® Pronto® Auto-Check Strip is inserted first into the device with the "Insert" and arrow icon facing upwards. Make sure the strip is free of fingerprints and contaminants by handling the strip from each side.

G Once the CSAN® Pronto® Auto-Check Strip is correctly inserted, the light will turn blue. Click on "Begin Test".

H When all three levels have been analyzed, the test results ("Success" or "Failure") will appear. All three levels must pass to obtain a successful test. Click on "Finish".
If the CSAN® Pronto® Auto-Check Strip does not pass, clean the cover glass with a lint-free cloth, and try again. If it still does not pass, please call CSAN @ 1-800-267-2726.

Once the CSAN® Pronto® Auto-Check Strip is correctly inserted, the light will turn blue. Click on "**Begin Test**".

CSAN® PRONTO® AUTO-CHECK STRIP STORAGE, MAINTENANCE, CLEANING, AND FREQUENCY

Storage and maintenance: To maintain proper functionality of the CSAN® Pronto® Auto-Check Strip, storage conditions should not vary outside a temperature range of 15–30°C nor exceed 60% humidity. The CSAN® Pronto® Auto-Check Strip should be stored in the packaging provided with the CSAN® Pronto® Auto-Check Strip.

Cleaning: To remove fingerprints and contaminants, the cover glass can be cleaned with a lint-free cloth.

The recommended CSAN® Pronto® Auto-Check Strip testing frequency: at least once a month. A defined frequency can be set by the device manager, and the end-user will be prompted to run the CSAN® Pronto® Auto-Check Strip test at that time. If not run, the device will automatically lock out.
